

EZ-Pilot Pro

GUIDANCE SYSTEM

The EZ-Pilot® Pro guidance system offers high accuracy guidance across MFWD tractors, 4WD's and combines. The added benefit of the EZ-Pilot Pro system is that vehicles are now able to be engaged in reverse to allow them to be lined for the next swath (max 15 seconds). Adding this feature can allow users to benefit from a high accuracy solution from the second the implement engages with the soil.

REDUCED FATIGUE

With hands-free guidance, the EZ-Pilot system allows you to operate with ease and improve safety on your farm.

STAY ENGAGED WHILE STOPPED

Get moving in the field with 1 less input to think about when you are in a stop-and-go application.

INTUITIVE USER EXPERIENCE

A mid-level precision ag farmer will have a better user experience to upgrade on future machines without changing hardware and an easier software upgrade path.

REDUCED CLUTTER

The system can be pre-equipped with several machines without the addition of an extra controller cost and very little cables in the cab.

OPTIMAL PERFORMANCE

The electric steering motor allows for unrestricted manual steering when assisted steering is not engaged.

Key Features

- ▶ High accuracy at an affordable price
- ▶ Vehicles can be engaged in reverse for up to 15 seconds
- ▶ Stay engaged while stopped
- ▶ Reduced hardware makes transferring between vehicles even quicker
