

Farmer Core

SOFTWARE

Connect, simplify, and streamline your entire farm operation with Farmer Core. Trimble's Farmer Core software complements your existing Trimble system to manage precision farming data and simplify display setup to capture the most value from every acre.

Farmer Core is part of the Trimble® Connected Farm®, our unified suite of precision ag solutions that encompass software, firmware, hardware, and correction services to simplify workflows, improve efficiency, and drive profitability in your operation.

	Features	Farmer Core
Farm Setup	User logins ¹	Up to 5
	Manage client/farm/field names with boundaries	✓
	Enter materials manually or by using a pre-built list of chemicals and seeds	✓
Farm Operations	Manage guidance lines	✓
	Includes AutoSync™ feature for syncing guidance lines and other data to all Trimble connected devices ²	✓
	Import/export or use third-party APIs to get data to/from precision farming displays	✓
	Track real-time equipment locations, current status, and fleet utilisation	✓
Farm Records	View and edit task details	✓
	Add materials and track purchases and usage by field with costs	✓
	Print a 'Proof of Placement' report that includes a coverage map and details for each task	✓
	Process yield data with yield cleaning tool	✓

Benefits

- ▶ Works with Trimble and third-party display data
- ▶ Leverages the all-new AutoSync feature to eliminate data duplication
- ▶ Ensures proper reporting for farm audits

1 Additional user logins for Farmer Core can be purchased separately.
 2 AutoSync automatically connects all your smartphones, computers and Trimble displays (using the Precision-IQ™ software). Each connected Trimble display requires a Display Connection with modem and data plan or a third-party wifi adapter.

AutoSync

FEATURE

Farming is hard enough. That's why Trimble created AutoSync, a new feature that works in the background to automatically sync vital farm data so everyone in the farm operation is working off the same playbook.

AutoSync automatically syncs guidance lines, field names, boundaries, materials, implements, vehicles, and operator information across all connected devices in your farm operation — including Trimble TMX-2050™ and GFX-750™ displays, as well as the Trimble Ag Software that you can access from any computer or mobile device.

AUTOSYNC LETS YOU:

- ▶ Create, edit, and delete data from your Trimble display (using Precision- IQ™) or Trimble Ag Software and have it automatically update your other connected devices.
- ▶ Set permissions that allow or prevent operators from creating, editing, and deleting data from the Trimble display.
- ▶ Save your vehicle profiles to Trimble Ag Software for restoring your vehicle settings if they are lost, eliminating re-calibration.

Benefits

- ▶ Saves time by avoiding USBs
- ▶ Reduces human error and data duplication
- ▶ Eliminates downtime due to re-calibration

WHAT DATA SYNCS?

Data Type		Create	Edit	Delete
Guidance Lines		✓	✓	✓
Coverage Maps ¹		✓		
Client/Farm/Field Names		✓	✓	✓
Boundaries		✓	✓	✓
Operators		✓	✓	✓
New!	Vehicle Profiles ²	✓	✓	✓
New!	Materials	✓	✓	✓
New!	Implements	✓	✓	✓

1 AutoSync only sends the coverage map data from the display to Trimble Ag Software. It does not share the coverage map data to other Precision-IQ displays that are connected with AutoSync.
 2 Vehicle profiles are created on the display and saved automatically within Trimble Ag Software during the AutoSync process. If the display is accidentally damaged or lost, AutoSync can restore all the vehicle settings to a new Trimble display.
